A PRACTICAL GUIDE FOR PEDRO

Lead Management

A clear next step for every enquiry.

Live capture · human stage checks

Use the board to show what has actually happened, then record the next action. Move a lead only when the stage below is true.

THE AGREED FIVE-STAGE FLOW

01	02	03	04	05
New Lead	**Contacted**	**Scheduled**	**Paid**	**Review Request Sent**

When to move each lead

01 New Lead

A new enquiry needs attention. Check the details and record who will follow up.

02 Contacted

You have called or personally messaged the lead and recorded it. Log the outcome; an automatic form reply does not count.

03 Scheduled

The booking is confirmed with the customer. Record the agreed date and job details; a requested service date does not count.

04 Paid

Full payment has been received and confirmed. A deposit does not count. A prepaid job still needs to be completed before a review request.

05 Review Request Sent

The service is completed and a review request has actually been sent. Record the send; payment or a review posted by the customer does not count.

FROM ENQUIRY TO FOLLOW-UP

The daily routine

Keep leads and bookings moving with a few simple habits.

GHL > Opportunities > Lead Management. Read the contact's Notes and your assigned Tasks.

1. **Review new enquiries**
   Open new enquiry tasks and read the latest contact note.
2. **Contact the lead**
   Call or send a personal message; log the attempt.
3. **Record the outcome**
   Note the response, booking decision or reason it did not proceed.
4. **Set the next follow-up**
   Give each open enquiry a next action and a date.
5. **Check upcoming bookings**
   Confirm dates, access details and anything still needed.
6. **Check completed, paid jobs**
   Request a review only after service is completed and full payment is confirmed. Record the send.

Lost or abandoned? Use the deal status and record a short reason; keep the five stages.

Repeated enquiry? Review the existing deal or closed history before reopening.

Where setup stands

Live capture · human stage checks | 21 October 2026, 01:45 BST

Website	Sales forms create leads; contact messages and feedback stay in Notes and Tasks.
Board	All five stages are live. Move cards when the stage definition is true.
Automation	Every receipt creates Pedro's task. Paid creates a completion-check task.
Verification	Five website form types checked in GHL. Customer contact and review sending are manual. No customer message has been sent during setup.
