A PRACTICAL GUIDE FOR PEDRO

Lead Management

A clear next step for every enquiry.

Five stages live · automatic enquiry tags

Use the board to show what has actually happened, then record the next action. Move a lead only when the stage below is true.

THE AGREED FIVE-STAGE FLOW

01	02	03	04	05
New Lead →	**Contacted** →	**Scheduled** →	**Paid** →	**Review Request Sent**

When to move each lead

01 New Lead

A new enquiry needs attention. Check the details and record who will follow up.

02 Contacted

You have called or personally messaged the lead and recorded it. Log the outcome; an automatic form reply does not count.

03 Scheduled

The booking is confirmed with the customer. Record the agreed date and job details; a requested service date does not count.

04 Paid

Full payment has been received and confirmed. A deposit does not count. A prepaid job still needs to be completed before a review request.

05 Review Request Sent

The service is completed and a review request has actually been sent. Record the send; payment or a review posted by the customer does not count.

FROM ENQUIRY TO FOLLOW-UP

The daily routine

Keep leads and bookings moving with a few simple habits.

GHL > Opportunities > Lead Management. Read the contact's Notes and your assigned Tasks.

1. **Review new enquiries**
   Read the latest contact note and open your assigned task.
2. **Contact and record**
   Call or personally message the lead. Log the attempt and move to Contacted.
3. **Set the next action**
   Add a dated follow-up task. Move to Scheduled when the customer confirms the booking.
4. **After the job**
   Confirm full payment. Request a review only after completed service, then record the actual send.

Find the right enquiry with tags

Source: Website	Type: Residential	Service: Deep clean

Source, type and service tags are automatic enquiry history. Tags accumulate on repeat enquiries; the board and latest Note show current progress.

Contacts > Smart Lists: HQC - Website enquiries, HQC - Residential interest and HQC - Commercial interest. New sales enquiries appear as they arrive; historical contacts have not been retagged.

Lost or abandoned? Use the deal status and record a short reason; keep the five stages.

Repeated enquiry? Read the latest Note and review the existing deal before reopening.

Where setup stands

Five stages live · automatic enquiry tags | 21 October 2026, 13:00 BST

Automation	Every receipt creates Pedro's task. Paid creates a completion-check task.
Verification	Five website form types checked in GHL. No customer message has been sent during setup.
